

About ERP Analysts

ERP Analysts is a specialized application service provider headquartered in Dublin, Ohio. We have a long track record of successful projects, providing services to mid market and fortune 500 companies. We have provided unmatched services and expertise to our client base since

Ranked No. 27
in the Top 100
IT Services
Companies

Ranked No. 234
In the Fastest
Growing
Private
Companies
in America

1999. Our client driven relationships have allowed us to grow to over one-hundred forty W2 employees throughout the US, a tremendous increase in comparison to the six dedicated employees we initially began with in 1999. This and other growth factors accounted for us being selected #234 of the Inc500's fastest growing privately held companies in the United States.

Unlike many other service providers, we possess the ability to successfully manage your engagements with our dedicated staff, while providing onsite services at competitive rates with minimal, if any, travel expenses. We also provide remote connectivity to augment your staff on an as needed basis. Our competitive rates do not limit our ability to successfully meet and exceed your expectations. Employees typically have over 6 years of consultative experience and 15 or more engagements providing them with the ability to make an immediate impact. Over 50% of our staff are Certified Oracle Consultants, providing you with the expertise to conduct your implementations, upgrades and support engagements in a timely and cost effective manner.

ERP Analysts can reduce your company's total cost of ownership, without forsaking quality or expertise. We provide various niche services and solutions that greatly increase productivity, save time and streamline technological processes.

ERP Analysts has assisted numerous large consulting firms, such as Papa Johns', the Department of Energy and CarMax, where specific functional and technical knowledge were necessary for the successful completion of their engagements. We rely heavily on referrals to grow our business and have no failed projects. Our two offices, in Atlanta, Georgia and Dublin, Ohio, work together to provide flexible solutions that are custom developed to meet specific needs. Simply put, we don't believe in cookie cutter solutions!

We challenge you to compare us to your current or potential application service provider. We will prove to be unmatched in service, quality, knowledge, timeliness, cost and professionalism.

Staff Augmentation

ERP Analysts is an application service provider staffed with over one hundred forty W2 employees dedicated to our PeopleSoft/Oracle practice. Of this staff over 50% are Oracle Certified Consultants with at least four years of service. Beyond our W2 staff we have a proprietary database of nearly five thousand prescreened professionals. We proactively develop quality employees who are dedicated to our organizational goals and focused on our mission, allows us to provide senior talent at competitive rates.

Employing our resources minimizes risk tremendously, allowing clients to assertively staff consultants on multiple engagements. Our employees are held to a higher standard and take pride in their individual accomplishments as well as the brand that they represent when they are on your engagement.

Our clients benefit through stronger project team relationships and an ever-growing knowledge base of project expertise, while we eliminate unforeseen roll-offs and enhance quality of work and performance.

Contact **ERP Analysts** to see how our resources can assist in successfully delivering on your most critical engagements. We can manage large scale efforts, provide as needed support or assist with short term engagements. Our consulting model can assist your organization by reducing costs while providing the senior expertise necessary to successfully deploy and maintain your applications. We are immediately available and eager to assist you in your challenges. Our successful staffing practices have accounted for year over year growth, strong reference-able clients, and no failed projects.

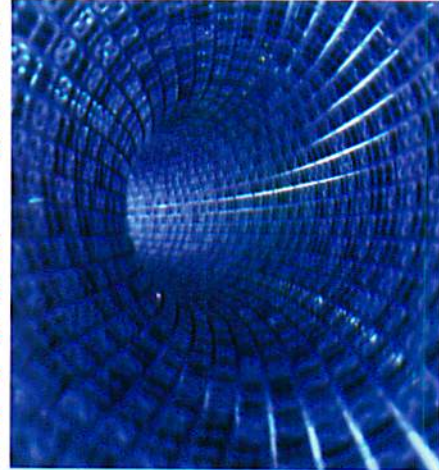

Performance Tuning

ERP Analysts has been very successful in providing performance tuning assistance. We are highly equipped to assess your systems and make recommendations. Our experts gather details and evaluate your systems ability to perform at optimum levels. This simple procedure will help you eliminate ineffective processes and streamline employee output.

Through our application management services we provide clients with system assessment, performance analysis, expectation setting, testing and knowledge transfer. This ensures that we tune the processes that are most critical to your operations. Many clients experience immediate results and improved efficiency and quality of work.

Successful tuning engagements result in a reduction in system response delays simplified transactions, greater customer satisfaction and delivered results. Our performance tuning services can literally give your employees more time in their day and easily result in hours of efficiency and recovered overhead.

Our resources are skilled and have a wealth of industry knowledge related to:

- Creating indexes.
- Optimizing poorly organized SQL statements.
- Utilizing the ideal join methods.
- Determining the best development tool (App Engine, SQR etc...)
- Employing hints within the system.
- Incorporating the use of third party tools to assist in SQL Tuning.
- Data Archiving and Purging recommendations and deployment.

ERP Analysts will create a realistic plan and set realistic expectations. You will be amazed at how such a small investment can make such high returns. We are immediately available to provide further details on our extensive performance tuning methodology and expertise.

Data Archive and Purge Experts

ERP Analysts takes pride in our ability to improve the performance of existing ERP systems. Through data archiving and purging, we can create an environment that is more productive, thus increasing profitability. Reducing unnecessary data within the system has many significant enhancements for your aging systems including the following:

- Improved online performance and response time.
- Reduced processing time.
- Increased benefits in conjunction with upgrades.
- Reduced the total cost of ownership.

It is highly recommended that any organization with over 5 years of data stored consider undertaking a data archiving and purging project, especially if an application upgrade is in the near future. ERP Analysts has multiple methods of enhancing your applications, without taking valuable time away from daily tasks. We also offer remote connectivity to reduce cost.

Contact ERP Analysts and find out the many benefits of this service. We guarantee a noticeable improvement in your system's performance and will show you a return on your investment. If we don't, our services are completely voluntary. Your users, systems and hardware will appreciate your decision.
